2.2 Update on ESMP development progress status

Industry Standing Group (ISG) meeting, 25 March 2024

Presented by Pedro Pina Ferreira, Monitoring VS Owner,
Sofia Zastavnik, ESMP Product Owner, and
Marcos Fernandez Gomez and Veronica Lipucci Di Paola, PMS Product Owners

Data collection

- Shortage information
- Supply and demand of medicines
- i-SPOC Registration

Analysis & Reporting

- Matching supply & demand
- Reporting findings and results
- Public reports

Shortages management

- Maintain critical medicinal product lists
- Evaluate and manage medicines shortages

Data integration

- PMS integration of CAPs and NAPs
- RMS integration
- Interoperability with NCA and Industry systems

ESMP Web portal

The future as of Q4 2024

Development: focus on NCA platform

Crisis phase: development of the **bulk download** of the pre-filled template with all product authorised in their countries, data validations upload to allow **NCA**s to submit **information on stocks and supply**

Crisis phase: development of the **bulk download of a pre-filled template, data validations and upload** to allow **NCA**s to submit **information on patient estimations**

Building the **User Interface** for **NCA submissions**, linking it to the Data analytics Dashboard

Setting up the **NCA Security access**

MSSG-led Preparedness phase: development of the **bulk download** of the pre-filled template with all product authorised in their countries, data validations upload to allow **NCA**s to submit information **on national demand**

Aligning of the features previously built for MAH submissions to a single user experience flow

Bugs, minor improvements of MAH Crisis submissions and Case management features, performance testing

External testing with MAH SMEs

Dedicated **end-user quality gate assesment** with **MAH SMEs** during a fully committed **week**, ensuring active participation from **EMA business** and **technical support teams**, for robust feedback gathering, meticulous issue identification, and collaborative resolution to deliver a refined and high-quality user experience

Business analysis

Crisis phase: gather business requirements on submission of data on the **active substance and final product production plan** and **capacity** data from **MAHs** for **NAPs**

Defining requirements for a **publicly accessible webpage** with information on actual **shortages** of products included in the critical medicines lists

Defining which datasets contain **commercially confidential information** and might require additional considerations

Data Analytics

Development of the **MSSG-led preparedness Monitoring tool** for matching of supply and NCA demand estimations

Implement the **automatic calculation for hospital and ICU medicines needs** based on the average use of a medicines and the estimated patients

Implement the **automatic calculation of vaccine availability** based on average use and amount of vaccines in stock or planned supply

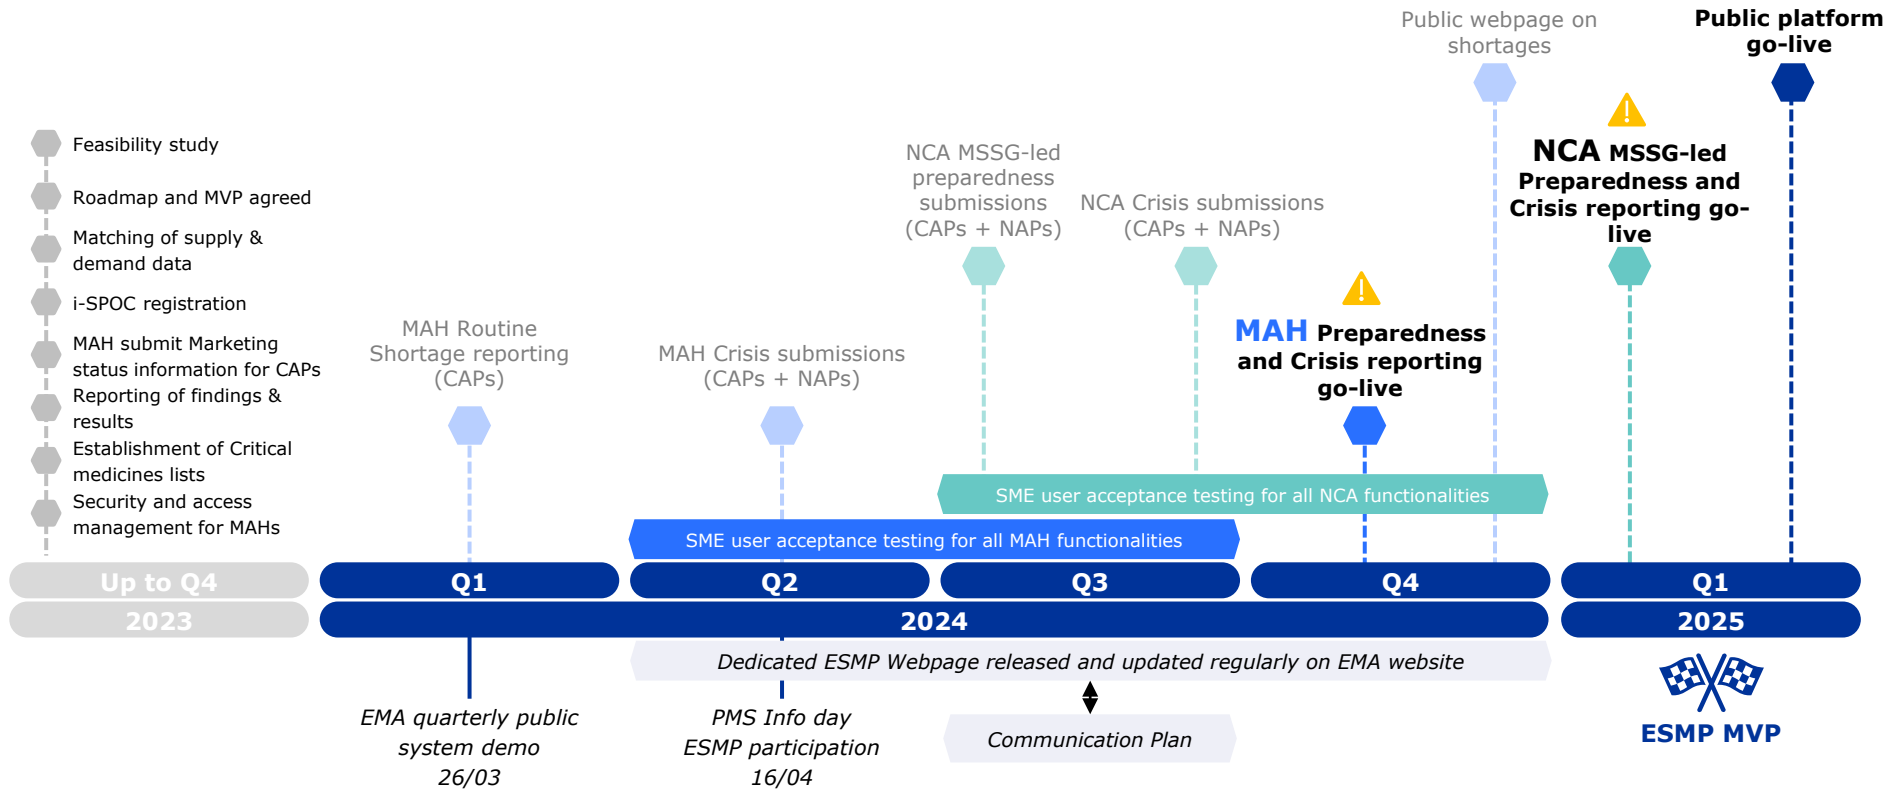

Implementation of the **Country Monitoring Tool UAT findings**

Allowing the possibility for the end user to select **unit of presentation** (tablets, capsules or equivalents) to display the outcomes of the analyses of the dashboard

ESMP development timeline

Legend:  Public delivery  Development completed  MAH functionalities  NCA functionalities  PMS dependency

-  Feasibility study
-  Roadmap and MVP agreed
-  Matching of supply & demand data
-  i-SPOC registration
-  MAH submit Marketing status information for CAPs
-  Reporting of findings & results
-  Establishment of Critical medicines lists
-  Security and access management for MAHs

- 1 Data on CAPs is already available to the PMS, imported through IRIS and used by ESMP 
- 2 Data on NAPs is available in xEVMPD and migration is ongoing to PMS. This data, once migrated, will need to be ingested by IRIS in order to be used by ESMP. Performance risk identified in the ingestion step by IRIS team.
- 3 Actions on MAHs required for data enrichment in xEVMPD/PMS for NAPs

MAH SUBMISSION: NAPs data at PACK SIZE in XEVMPD

The insertion of data on pack sizes of NAPs to be populated by MAHs in phases:

- **Union list of critical medicines** to be enriched via xEVMPD/Art57 **as soon as possible**, deadline Feb 2025
- **Crisis-specific lists and MSSG-led preparedness**, MAHs enrich data in XEVMPD/Art 57 **within 2 weeks** after crisis is declared

MAH SUBMISSION: NAPs MANUFACTURING SITES in PMS PUI

- **Union list of critical medicines** to be enriched via PMS Product User Interface from Feb to Dec 2025

- 4 ESMP Interoperability with National Databases: Dependency on NAPs data being available in PMS so that NCAs can map the data to their systems. NAPs data will be available in PMS API (Q2 2024) and in Product UI (Q3 2024).

ESMP Key Drivers

- PMS dependencies and required actions for ESMP
- Industry actions on PMS/XEVMPD to prepare for ESMP

PMS Info-Day (16 April 2024)

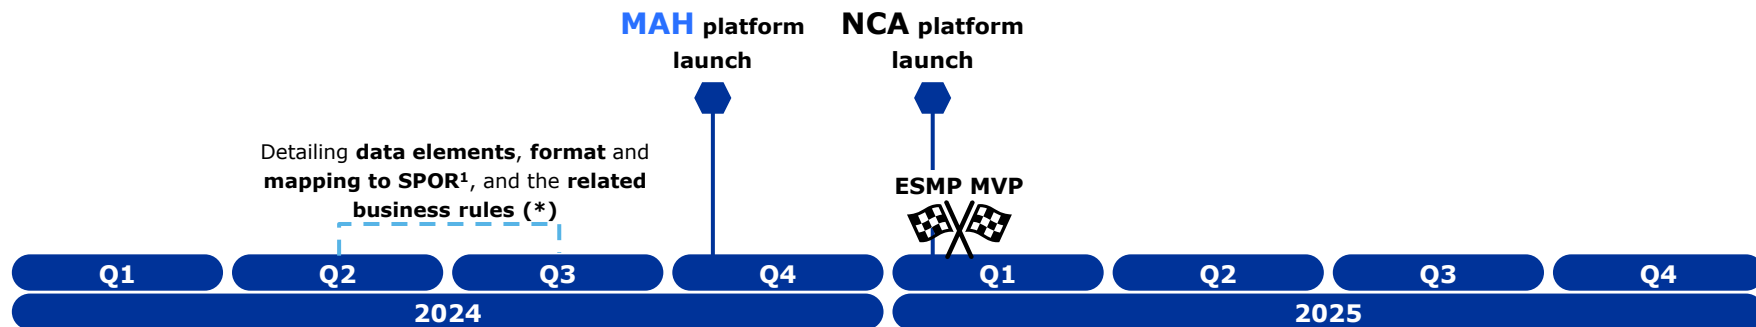

This event aims to offer further insights into the **implications of PMS for key stakeholders** and present the **connection of PMS to other EMA digital solutions** (i.e. eAF, SPOR, ESMP, ePI, etc.)

The event will be available **online for live broadcast** on the dedicated **web page** and **EMA YouTube Channel**.

Details are published soon on [EMA Website](#).

Important : To prepare for ESMP launch, ensure readiness to report and favour interoperability with national and industry systems, MAHs and NCAs should:

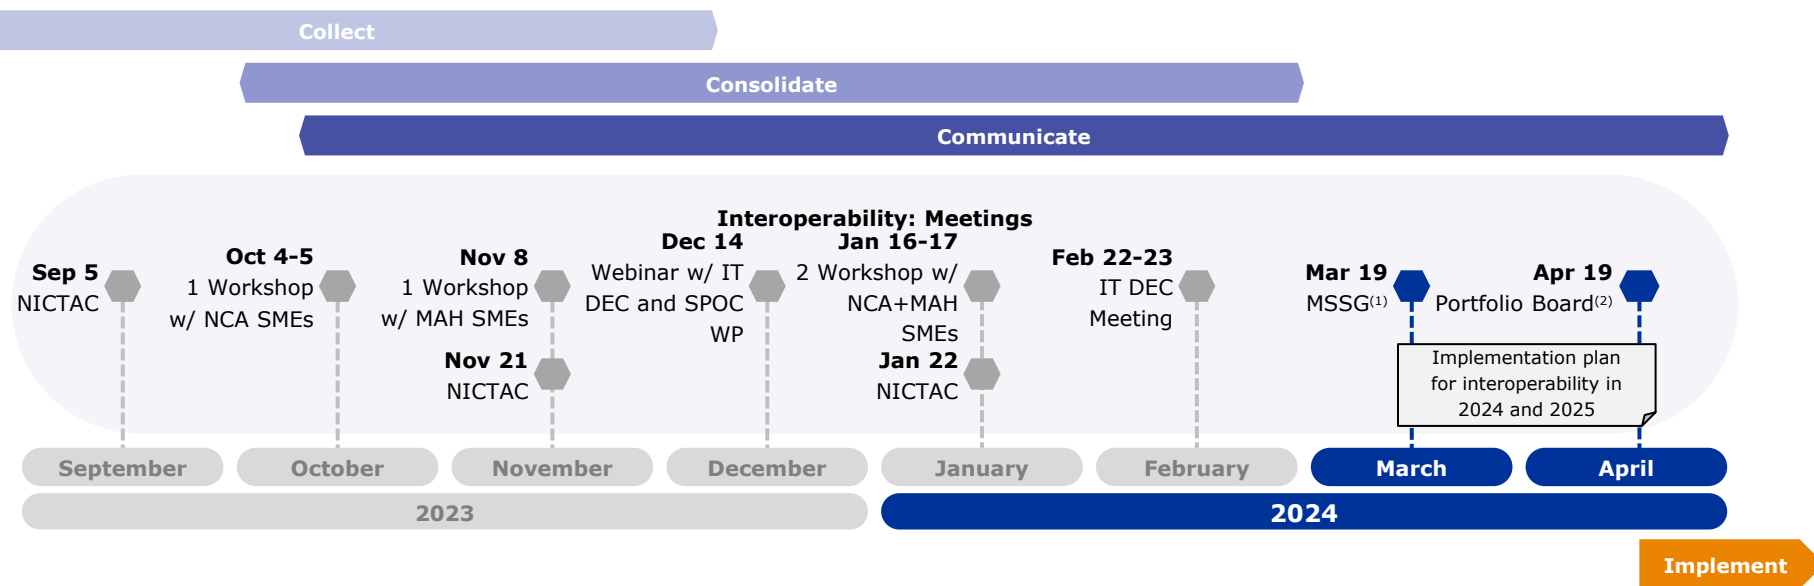

- **Review business and technical specifications** of datasets in scope of reporting requirements (*);
- **Collect relevant data** from internal source system(s);
- **Align data** in scope of reporting requirements with dataset specifications;
- Plan and **develop possible changes** in internal business processes and IT systems.

Options for data submission

⁸ Note: As an example, the use of SPOR implies that your MAH and NCA reconcile the relevant product information with the corresponding product in PMS.

Work Plan on ESMP interoperability options for MAHs and NCAs

9 Please note: each meeting with stakeholders was followed by post-mailing in which outcomes and relevant materials are shared

(1) MSSG endorses the Interoperability approach

(2) Portfolio Boards endorses the Business Case

@EMA_News

Interoperability is defined as the **ability of organisations to interact towards mutually beneficial goals**, involving the **sharing of information and knowledge** between these organisations, through the business processes they support, by means of the exchange of data between their ICT systems.

PMS

XEVMPD Migration

PMS CAPs & NAPs go-live (April)

All product data from SIAMED and XEVMPD have been migrated to PMS. PMS is kept up-to-date – changes to product data made in SIAMED and XEVMPD are regularly transferred to PMS.

IRIS

CAPS Re-load

NAPS Load

CAPs & NAPs data available to ESMP

All product data (CAPs and NAPs) are available to ESMP. This milestone depends on the **IRIS Platform** loading NAPs data from PMS into IRIS (**NAPs load**).

Performance improvements

ESMP

Delivery of MAH features

ESMP launch for MAHs

MAH submit MSSG-led preparedness and Crisis reporting (CAPs + NAPs). This milestone depends on the availability of **NAP data** milestone.

Delivery of NCA features

ESMP full MVP go-live

NCA MSSG-led Preparedness and Crisis reporting. This milestone depends on the availability of **NAP data** (at pack size) milestone.

MAHs

MAH submit pack size for Union list of critical medicines (NAPs) to XEVMPD

This milestone depends on the availability of **UI Pages Phase 2 (manufacturers)**

MAHs enrich PMS with manufacturer data

Submit manufacturer data for Union list of critical medicines (NAPs) in Product UI or PMS API
