## Summary of opinion<sup>1</sup> (post authorisation)

---

### Lonsurf trifluridine / tipiracil

On 25 July 2019, the Committee for Medicinal Products for Human Use (CHMP) adopted a positive opinion recommending a change to the terms of the marketing authorisation for the medicinal product Lonsurf. The marketing authorisation holder for this medicinal product is Les Laboratoires Servier.

The CHMP adopted a new indication for gastric cancer and a change to the existing indication for colorectal cancer. The full indications for Lonsurf will now be as follows<sup>2</sup>:

#### **“Colorectal cancer**

Lonsurf is indicated as **monotherapy** for the treatment of adult patients with metastatic colorectal cancer (CRC) who have been previously treated with, or are not considered candidates for, available therapies including fluoropyrimidine-, oxaliplatin- and irinotecan-based chemotherapies, anti-VEGF agents, and anti EGFR agents.

#### **Gastric cancer**

**Lonsurf is indicated as monotherapy for the treatment of adult patients with metastatic gastric cancer including adenocarcinoma of the gastroesophageal junction, who have been previously treated with at least two prior systemic treatment regimens for advanced disease (see section 5.1)”.**

Detailed recommendations for the use of this product will be described in the updated summary of product characteristics (SmPC), which will be published in the revised European public assessment report (EPAR), and will be available in all official European Union languages after a decision on this change to the marketing authorisation has been granted by the European Commission.

---

<sup>1</sup> Summaries of positive opinion are published without prejudice to the Commission decision, which will normally be issued 67 days from adoption of the opinion
